REQUEST UNDER 37 C.F.R. §1.181 TO WITHDRAW HOLDING OF ABANDONMENT

Sir:

Applicants hereby request withdrawal of the holding of abandonment announced in the Notice of Abandonment mailed September 22, 2003.

This is a renewed petition, following the dismissal of a petition filed September 26, 2003. That petition was dismissed only because it did not include a new Sequence Listing in computer-readable form. The dismissal of the petition was dated February 24, 2004 and gave Applicants a non-extendable one month period in which to file a fully compliant computer-readable form of the Sequence Listing. However, *Applicants did not receive the notice of dismissal until January 7, 2005*, after Applicants contacted both Examiner Celsa and his supervisor, Andrew Wang, who, after some difficulty in locating the file, kindly forwarded a copy of the dismissal.

A copy of the original petition and all supporting papers filed with it accompanies this renewed petition, as does a copy of the dismissal notice.

A copy of the Sequence Listing in paper and computer-readable form (floppy disk) and in full compliance with 37 C.F.R. §§1.821-1.825 is submitted herewith. In accord with 37 C.F.R. §§1.821(f) and (g), Applicants hereby state that the paper copy and the computer readable form of the Sequence Listing submitted herewith are supported in the application and contain no new matter and that the information recorded in computer readable form is identical to the paper copy of the sequence listing.

In support of this renewed petition, Applicants also submit the following:

1. A copy of a Status Inquiry filed by Applicants on August 13, 2004, including a copy of the date-stamped return postcard noting receipt by the U.S.P.T.O. on August 16, 2004. To date, Applicants have received *no response* to this inquiry.
2. A copy of the Mail Log of Applicant's representative, Palmer & Dodge LLP, showing all U.S.P.T.O. correspondence from January 5, 2004 (after filing of the petition, but before the mailing date of the petition dismissal notice) to January 20, 2005. Palmer & Dodge keeps a mail log in a separate document which is maintained and updated by our Patent Docketing Department daily. When Palmer & Dodge receives mail from the U.S. Patent and Trademark Office, Palmer & Dodge enters the correspondence into the mail log, and then into the electronic docketing system (CPI). The enclosed mail log print-out shows only two entries (highlighted) related to Docket No. 8039/1090: a) 8/20/04, showing receipt of the date-stamped return postcard from the Status Inquiry filed August 13, 2004 (see page 171); and b) 1/7/05, showing receipt of the dismissal notice mailed by Examiner Wang (see page 324). There is no entry for the dismissal notice prior to this point, indicating that it was not earlier received.
3. A copy of the CPI docket system report for this application, showing that at no time was a response period docketed for the dismissal notice. Please also note the multiple entries docketing previous response periods regarding this application. In addition to the docket system search, a search of the application's file jacket has been conducted and did not locate the dismissal notice, again indicating that the notice was not received.

Applicants submit that good faith efforts were made at all times to comply with the requirements of the U.S.P.T.O. with regard to this application. In view of Applicants' failure to receive the petition dismissal notice and in view of the dismissal notice's statement that "Applicants are, however, given one month from the date of mailing of this decision to file a fully compliant CRF. If a fully compliant CRF is timely filed the holding of abandonment will be withdrawn," Applicants submit that the filing of the fully compliant CRF at this time entitles Applicant to a withdrawal of the holding of abandonment. Such action is respectfully requested.

Serial No.: 09/710,444

No fee is believed to be due for this renewed request, however, the Office is hereby authorized to charge any necessary fees to Deposit Account No., 16-0085, Reference No. 8039/1090.

Respectfully submitted,

Date: January 21, 2005

TRANSMITTAL LETTER

Enclosed for filing the above-identified patent application, please find the following documents:

1. Request Under 37 C.F.R. 1.181 to Withdraw Holding of Abandonment;
2. Copy of the Request Filed September 26, 2003 with All Supporting Papers;
3. Copy of Petition of Dismissal Notice Received January 7, 2005;
4. Replacement Copies of Sequence Listing in Paper and Computer Readable (Diskette) Forms;
5. Copy of the Status Inquiry Filed August 13, 2004, with a copy of the Date-Stamped Return Post Card;
6. Copy of the Palmer & Dodge Mail Log from January 5, 2004 to January 20, 2005;
7. Copy of CPI Docket System Report for this Application; and
8. Return Post Card.

The Commissioner for Patents is hereby authorized to charge any fees to Deposit Account No. 16-0085, Reference 8039/1090. A duplicate of this transmittal letter is enclosed for this purpose.

Respectfully submitted,

Date: January 21, 2005

: PETITION DECISION
:
:

This is in response to the petition under 37 CFR 1.181, filed September 29, 2003, for withdrawal of abandonment of the above identified application based on filing of a timely reply.

A review of the file history shows that the examiner mailed a first Notice to comply with Sequence Rules on February 27, 2002, setting a one month extendable time period for compliance. Applicants submitted a first CRF sequence listing on July 30, 2002, including a four month extension of time. The listing was found to contain numerous compliance errors. Applicants were notified of the errors in a letter to comply mailed on October 23, 2002, setting a one month extendable time period for reply. Applicants replied on November 13, 2002, by mailing the new CRF disk to BOX NON FEE AMENDMENT rather than the Arlington, VA address suggested. This appears to have been an inadvertent error. As a consequence the disk was unreadable. A new letter requiring compliance was mailed to applicants on March 17, 2003, accompanied by the raw sequence listing error report. Applicants filed a new CRF disk on April 11, 2003. Upon review, this CRF disk also contained errors and was thus not in compliance with the Sequence Rules. As a consequence, the examiner mailed a Notice of Abandonment to applicants on September 22, 2003, accompanied by a copy of the raw sequence listing error report. The reason for abandonment was failure to comply with sequence rules. Applicants filed this petition on September 29, 2003, stating that all letters from the Office have been timely replied to and requesting withdrawal of abandonment. No new CRF was filed with the petition. Therefore the application is not in condition for examination as applicants have not complied with the sequence requirements of the Office. Therefore the holding of abandonment will not be withdrawn at this time. Applicants are, however, given one month from the date of mailing of this decision to file a fully compliant CRF. If a fully compliant CRF is timely filed the holding of abandonment will be withdrawn. NO EXTENSIONS OF TIME WILL BE PERMITTED.

The petition is **DISMISSED** until the above CRF condition is met..

The application will be retained in storage.

: PETITION DECISION
:
:

This is in response to the petition under 37 CFR 1.181, filed September 29, 2003, for withdrawal of abandonment of the above identified application based on filing of a timely reply.

A review of the file history shows that the examiner mailed a first Notice to comply with Sequence Rules on February 27, 2002, setting a one month extendable time period for compliance. Applicants submitted a first CRF sequence listing on July 30, 2002, including a four month extension of time. The listing was found to contain numerous compliance errors. Applicants were notified of the errors in a letter to comply mailed on October 23, 2002, setting a one month extendable time period for reply. Applicants replied on November 13, 2002, by mailing the new CRF disk to BOX NON FEE AMENDMENT rather than the Arlington, VA address suggested. This appears to have been an inadvertent error. As a consequence the disk was unreadable. A new letter requiring compliance was mailed to applicants on March 17, 2003, accompanied by the raw sequence listing error report. Applicants filed a new CRF disk on April 11, 2003. Upon review, this CRF disk also contained errors and was thus not in compliance with the Sequence Rules. As a consequence, the examiner mailed a Notice of Abandonment to applicants on September 22, 2003, accompanied by a copy of the raw sequence listing error report. The reason for abandonment was failure to comply with sequence rules. Applicants filed this petition on September 29, 2003, stating that all letters from the Office have been timely replied to and requesting withdrawal of abandonment. No new CRF was filed with the petition. Therefore the application is not in condition for examination as applicants have not complied with the sequence requirements of the Office. Therefore the holding of abandonment will not be withdrawn at this time. Applicants are, however, given one month from the date of mailing of this decision to file a fully compliant CRF. If a fully compliant CRF is timely filed the holding of abandonment will be withdrawn. NO EXTENSIONS OF TIME WILL BE PERMITTED.

The petition is **DISMISSED** until the above CRF condition is met..

The application will be retained in storage.

Should there be any questions about this decision please contact William R. Dixon, Jr., by letter addressed to Director, TC 1600, at the address listed above, or by telephone at 703-272-0519 or by facsimile sent to the general Office facsimile number.

ERROR REPORT

The Biotechnology Systems Branch of the Scientific and Technical Information Center (STIC) detected errors when processing the following computer readable form:

Application Serial Number: 09/710,444B
Source: 1600
Date Processed by STIC: 4-17-03

THE ATTACHED PRINTOUT EXPLAINS DETECTED ERRORS.

PLEASE FORWARD THIS INFORMATION TO THE APPLICANT BY EITHER:

- 1) INCLUDING A COPY OF THIS PRINTOUT IN YOUR NEXT COMMUNICATION TO THE APPLICANT, WITH A NOTICE TO COMPLY or,
- 2) TELEPHONING APPLICANT AND FAXING A COPY OF THIS PRINTOUT, WITH A NOTICE TO COMPLY

FOR CRF SUBMISSION AND PATENTIN SOFTWARE QUESTIONS, PLEASE CONTACT MARK SPENCER, 703-308-4212.

TO REDUCE ERRORED SEQUENCE LISTINGS, PLEASE USE THE CHECKER VERSION 4.0 PROGRAM, ACCESSIBLE THROUGH THE U.S. PATENT AND TRADEMARK OFFICE WEBSITE. SEE BELOW FOR ADDRESS:

<http://www.uspto.gov/web/offices/pac/checker>

Applicants submitting genetic sequence information electronically on diskette or CD-Rom should be aware that there is a possibility that the disk/CD-Rom may have been affected by treatment given to all incoming mail.

Please consider using alternate methods of submission for the disk/CD-Rom or replacement disk/CD-Rom.

Any reply including a sequence listing in electronic form should NOT be sent to the 20231 zip code address for the United States Patent and Trademark Office, and instead should be sent via the following to the indicated addresses:

1. EFS-Bio (<<http://www.uspto.gov/efc/efs/downloads/documents.htm>> , EFS Submission User Manual - ePAVE)
2. U.S. Postal Service: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450
3. Hand Carry directly to:
U.S. Patent and Trademark Office, Technology Center 1600, Reception Area, 7th Floor, Examiner Name, Sequence Information, Crystal Mall One, 1911 South Clark Street, Arlington, VA 22202
Or
U.S. Patent and Trademark Office, Box Sequence, Customer Window, Lobby, Room 1B03, Crystal Plaza Two, 2011 South Clark Place, Arlington, VA 22202
4. Federal Express, United Parcel Service, or other delivery service to: U.S. Patent and Trademark Office, Box Sequence, Room 1B03-Mailroom, Crystal Plaza Two, 2011 South Clark Place, Arlington, VA 22202

Revised 04/24/2003

Raw Sequence Listing Error Summary

ERROR DETECTED

SUGGESTED CORRECTION

SERIAL NUMBER: _____

ATTN: NEW RULES CASES: PLEASE DISREGARD ENGLISH "ALPHA" HEADERS, WHICH WERE INSERTED BY PTO SOFTWARE

- 1 Wrapped Nucleics
 Wrapped Aminos The number/text at the end of each line "wrapped" down to the next line. This may occur if your file was retrieved in a word processor after creating it. Please adjust your right margin to .3; this will prevent "wrapping."
- 2 Invalid Line Length The rules require that a line not exceed 72 characters in length. This includes white spaces.
- 3 Misaligned Amino
 Numbering The numbering under each 5th amino acid is misaligned. Do not use tab codes between numbers; use space characters, instead.
- 4 Non-ASCII
 art. The submitted file was not saved in ASCII(DOS) text, as required by the Sequence Rules. Please ensure your subsequent submission is saved in ASCII text.
- 5 Variable Length Sequence(s) contain n's or Xaa's representing more than one residue. Per Sequence Rules, each n or Xaa can only represent a single residue. Please present the maximum number of each residue having variable length and indicate in the <220>-<223> section that some may be missing.
- 6 PatentIn 2.0
 "bug" A "bug" in PatentIn version 2.0 has caused the <220>-<223> section to be missing from amino acid sequences(s) . Normally, PatentIn would automatically generate this section from the previously coded nucleic acid sequence. Please manually copy the relevant <220>-<223> section to the subsequent amino acid sequence. This applies to the mandatory <220>-<223> sections for Artificial or Unknown sequences.
- 7 Skipped Sequences
 (OLD RULES) Sequence(s) missing. If intentional, please insert the following lines for each skipped sequence:
 (2) INFORMATION FOR SEQ ID NO:X: (insert SEQ ID NO where "X" is shown)
 (i) SEQUENCE CHARACTERISTICS: (Do not insert any subheadings under this heading)
 (xi) SEQUENCE DESCRIPTION:SEQ ID NO:X: (insert SEQ ID NO where "X" is shown)
 This sequence is intentionally skipped

 Please also adjust the "(ii) NUMBER OF SEQUENCES:" response to include the skipped sequences.
- 8 Skipped Sequences
 (NEW RULES) Sequence(s) missing. If intentional, please insert the following lines for each skipped sequence.
 <210> sequence id number
 <400> sequence id number
 000
- 9 Use of n's or Xaa's
 (NEW RULES) Use of n's and/or Xaa's have been detected in the Sequence Listing.
 Per 1.823 of Sequence Rules, use of <220>-<223> is MANDATORY if n's or Xaa's are present.
 In <220> to <223> section, please explain location of n or Xaa, and which residue n or Xaa represents.
- 10 Invalid <213>
 Response Per 1.823 of Sequence Rules, the only valid <213> responses are: Unknown, Artificial Sequence, or scientific name (Genus/species). <220>-<223> section is required when <213> response is Unknown or is Artificial Sequence
- 11 Use of <220>
  Sequence(s) missing the <220> "Feature" and associated numeric identifiers and responses.
 Use of <220> to <223> is MANDATORY if <213> "Organism" response is "Artificial Sequence" or "Unknown." Please explain source of genetic material in <220> to <223> section.
 (See "Federal Register," 06/01/1998, Vol. 63, No. 104, pp. 29631-32) (Sec. 1.823 of Sequence Rules)
- 12 PatentIn 2.0
 "bug" Please do not use "Copy to Disk" function of PatentIn version 2.0. This causes a corrupted file, resulting in missing mandatory numeric identifiers and responses (as indicated on raw sequence listing). Instead, please use "File Manager" or any other manual means to copy file to floppy disk.
- 13 Misuse of n n can only be used to represent a single nucleotide in a nucleic acid sequence. N is not used to represent any value not specifically a nucleotide.

RAW SEQUENCE LISTING ERROR SUMMARY
PATENT APPLICATION: US/09/710,444B

DATE: 06/02/2003
TIME: 14:40:19

Input Set : A:\sequence listing\Mzw2841.txt
Output Set: N:\CRF4\06022003\I710444B.raw

Please Note:

Use of n and/or Xaa have been detected in the Sequence Listing. Please review the Sequence Listing to ensure that a corresponding explanation is presented in the <220> to <223> fields of each sequence which presents at least one n or Xaa.

Seq#:2; N Pos. 23,24,29,30,32,33,38,39,41,42,44,45,50,51

Seq#:5; N Pos. 23,24,26,27,29,30,32,33

Seq#:8; N Pos. 21,22,30,31

Seq#:11; N Pos. 23,24,29,30,32,33,35,36,38,39

Seq#:14; N Pos. 21,22,27,28,33,34

Seq#:17; N Pos. 23,24,26,27,29,30,32,33

Seq#:20; N Pos. 21,22,27,28,30,31,33,34

Seq#:23; N Pos. 23,24

Invalid <213> Response:

Use of "Artificial" only as "<213> Organism" response is incomplete,
per 1.823(b) of New Sequence Rules. Valid response is Artificial Sequence.

Seq#:1,2,3,4,5,6,7,8,9,10,11,12,13,14,15,16,17,18,19,20,21,22,23,24,25,26,27

Seq#:28,29,30,31,32,33,34,35,36,37,38,39,40,41,42,43,44,45,46,47,48,49,50,51

REQUEST UNDER 37 C.F.R. §1.181 TO WITHDRAW HOLDING OF ABANDONMENT

Sir:

Applicants hereby request withdrawal of the holding of abandonment announced in the Notice of Abandonment mailed September 22, 2003.

This is filed in response to the Notice of Abandonment of Non-Provisional Application mailed by the US Patent & Trademark Office on September 22, 2003.

The Notice stated that Applicants failed to comply with the Sequence Rules within 6 months of the first letter, dated February 27, 2002, and within 1 month of the Non-bona fide response letter dated March 17, 2003. Applicants submit that bona fide responses to both communications from the Patent Office were timely filed and that the holding of abandonment is in error. This assertion is supported as follows. Enclosed are the following:

- 1) A copy of the Notice to Comply mailed February 27, 2002;
- 2) A copy of the response filed July 25, 2002, including fee and petition for Extension of Time. This response included paper and diskette copies of the sequence listing and the required statement under 37 CFR §1.821 (f) and (g);
- 3) A copy of the second Notice to Comply (Non-bona fide). That notice stated that the disk was melted by the U.S.P.T.O. and set a 1 month non-extendable deadline for response. Applicants note that the response was properly mailed to the Arlington, VA address established for Sequence Diskette Submission to avoid irradiation damage to the diskette;
- 4) A copy of the filing of April 8, 2003, responsive to the March 17, 2003 communication. That filing included a new diskette, paper copy of the Sequence Listing and Statement under 37 C.F.R. 1.821 (f) and (g) and a return postcard. Applicants submit that the April 8, 2003 filing was well within the 1 month time set in the second Notice to Comply; and

5) A copy of the O I.P.E.-stamped copy of the return postcard filed with the April 8, 2003 response to the second Notice to Comply. The filing was stamped by the U.S.P.T.O. on April 11, 2003. The return of the date-stamped postcard acknowledges receipt of all items asked for in the second Notice to Comply: a substitute diskette; a substitute paper copy of the Sequence Listing; and a Statement Under 37 CFR 1.821 (f) and (g).

In view of the above, Applicants submit that Applicants have fully and timely responded to all Notices from the U.S.P.T.O. Applicants therefore respectfully request notice that the holding of abandonment has been withdrawn.

Because it is believed that the Notice of Abandonment is in error, it is believed that no fees are due with this filing. However, the Commissioner for Patents is authorized to charge all fees in the total amount to Deposit Account No. 16-0085, Reference 8039/1090.

Respectfully submitted,

NOTICE TO COMPLY:SEQUENCE RULES (NONBONAFIDE)

1. Applicant's submission of a computer readable form (CRF) and corresponding paper sequence listing in paper no. 12(dated 12/10/02) is acknowledged.

However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures and CRF PROBLEM REPORT. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) before the application can be examined under 35 U.S.C. §§ 131 and 132.

Applicant is given ONE MONTH (NON-EXTENDIBLE) from the mailing date of this communication within which to COMPLY WITH THE SEQUENCE RULES, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Celsa whose telephone number is (703) 305-7556. If the examiner cannot be reached, inquiries can be directed to Supervisory Patent Examiner Andrew Wang whose telephone number is (703) 306-3217. Inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

**NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING
NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES**

Applicant must file the items indicated below within the time period set the Office action to which the Notice is attached to avoid abandonment under 35 U.S.C. § 133 (extensions of time may be obtained under the provisions of 37 CFR 1.136(a)).

The nucleotide and/or amino acid sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 C.F.R. 1.821 - 1.825 for the following reason(s):

- ☒ 1. This application clearly fails to comply with the requirements of 37 C.F.R. 1.821-1.825. Applicant's attention is directed to the final rulemaking notice published at 55 FR 18230 (May 1, 1990), and 1114 OG 29 (May 15, 1990). If the effective filing date is on or after July 1, 1998, see the final rulemaking notice published at 63 FR 29620 (June 1, 1998) and 1211 OG 82 (June 23, 1998).
- ☐ . This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 C.F.R. 1.821(c).
- ☐ 3. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 37 C.F.R. 1.821(e).
- ☐ . A copy of the "Sequence Listing" in computer readable form has been submitted. However, the content of the computer readable form does not comply with the requirements of 37 C.F.R. 1.822 and/or 1.823, as indicated on the attached copy of the marked -up "Raw Sequence Listing."
- ☒ 5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A Substitute computer readable form must be submitted as required by 37 C.F.R. 1.825(d).
- ☐ 6. The paper copy of the "Sequence Listing" is not the same as the computer readable form of the "Sequence Listing" as required by 37 C.F.R. 1.821(e).
- ☐ . Other:

Applicant Must Provide:

- ☒ An initial or **substitute** computer readable form (CRF) copy of the "Sequence Listing".
- ☒ An initial or **substitute** paper copy of the "Sequence Listing", as well as an amendment directing its entry into the specification.
- ☒ A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d).

Sequence Rule Compliance: NOTICE TO COMPLY

This application fails to comply with the sequence rule requirements of 37 C.F.R. §§ 1.821-1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. This application encompasses sequences needing sequence identifiers (e.g. see pages 9, 15, 24, 30, 35, 36, 38, figures etc.).

APPLICANT IS GIVEN 30 days FROM THE DATE OF THIS LETTER WITHIN WHICH TO COMPLY WITH THE SEQUENCE RULES, 37 C.R.F. §§ 1.821-1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 C.F.R. § 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 C.F.R. § 1.136. In no case may an applicant extend the period for response beyond the six month statutory period. Direct the response to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the response.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Celsa whose telephone number is (703) 305-7556. If the examiner cannot be reached, inquiries can be directed to Supervisory Patent Examiner Venkat whose telephone number is (703) 308-0570. The fax number for the organization where this application or proceeding is assigned is (703) 308-4242. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Attachment for PTO-948 (Rev. 03/01, or earlier)

6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.

Arlington, VA 22202

RESPONSE TO OFFICE ACTION

Sir:

This is filed in response to the Office Action of Non-Provisional Application mailed March 17, 2003 in the above-noted U.S. patent application.

The Office Action stated that the Applicant must provide substitute computer readable and paper copies of the sequence listing along with the sequence listing statement required under 37 C.F.R. §1.821(f) and (g), because the disk submitted December 10, 2002 was damaged by the P.T.O.

Enclosed please find a Substitute paper copy of the Sequence Listing, a Substitute Computer Readable copy of the Sequence Listing, and the Statement Under 37 C.F.R. §1.821(f) and (g).

It is believed that no fees are due. However, if necessary, the Commissioner for Patents is hereby authorized to charge all fees in the total amount to Deposit Account No. 16-0085, Reference 8039/1090. A duplicate of this transmittal letter is enclosed for this purpose.

Respectfully submitted,

Date: April 8, 2003

STATEMENT UNDER 37 C.F.R. §1.821(f) and (g)

Sir:

This paper is submitted in response to the Office Action mailed by the USPTO on March 17, 2003.

In accordance with 37 C.F.R. §1.821 (f) I hereby state that the paper copy and the computer readable form of the Sequence Listing submitted herewith in the above-identified patent application are supported in the application and contain no new matter. I hereby state that the information recorded in computer readable form is identical to the written sequence listing.

In accordance with 37 C.F.R. §1.821 (g), I hereby state that the computer readable form of the Sequence Listing submitted herewith contains no new matter.

Respectfully submitted,

Date: April 8, 2003

TRANSMITTAL LETTER

Enclosed for filing the above-identified patent application, please find the following documents:

1. Amendment in Response to Notice to Comply dated February 27, 2002;
2. Copy of Notice to Comply;
3. Paper Copy of the Sequence Listing (59 pgs);
4. Computer Readable Copy of the Sequence Listing;
5. Sequence Statement Under 37 C.F.R. § 1.821(f) and (g);
6. Petition for Four Month's Extension of Time;
7. Check in the amount of \$720.00; and
8. Return Post Card.

The Commissioner for Patents is hereby authorized to charge any additional fees or credit any overpayment in the total fees to Deposit Account No. 16-0085, Reference 8039/1090. A duplicate of this transmittal letter is enclosed for this purpose.

Respectfully submitted,

PETITION FOR EXTENSION OF TIME

Dear Sir:

Applicant respectfully petitions under 37 C.F.R. § 1.136(a) for an Extension of Time of four months to file a Response in the above-identified patent application. This will serve to extend the time for filing the Response to the Notice to Comply mailed February 27, 2002 from March 27, 2002, up to and including July 27, 2002.

Pursuant to 37 C.F.R. § 1.17, enclosed is the requisite extension fee of \$720.00 for maintaining the pendency of the present application. The Commissioner of Patents is hereby authorized to charge any additional fees or credit any overpayment to Deposit Account No. 16-0085, Reference No. 8039/1090. A duplicate of this letter is enclosed for that purpose.

Respectfully submitted,

STATEMENT UNDER 37 C.F.R. §1.821 (f) and (g)

Sir:

This paper is submitted in response to the Notice to Comply mailed by the USPTO on February 27, 2002.

In accordance with 37 C.F.R. §1.821 (f) I hereby state that the paper copy and the computer readable form of the Sequence Listing submitted herewith in the above-identified patent application are supported in the application and contain no new matter. I hereby state that the information recorded in computer readable form is identical to the written sequence listing.

In accordance with 37 C.F.R. §1.821 (g), I hereby state that the computer readable form of the Sequence Listing submitted herewith contains no new matter.

AMENDMENT

Sir:

This is filed in response to the Examiner's Notice to Comply with nucleotide or amino acid sequence listing requirements mailed February 27, 2002 in the above noted U.S. Patent Application. Kindly enter the following amendments and remarks.

In the Specification:

Replace the paragraph at lines 14 to 23 on page 15 with the following replacement paragraph:

A sequence (PAGLSEGSTIEGRGAHE; SEQ ID NO: 1) comprising several proteolytic sites is inserted in the flexible glycine-rich region between the D2 and D3 domains of the phage p3. Incubation of the phage (fd-K108) under native conditions with trypsin, thermolysin or subtilisin now resulted in almost complete loss of infectivity (from 10^7 to < 10 TU/ml) and incubation with Glu-C and chymotrypsin resulted in a major loss (from 10^7 to 10^4 TU/ml). This indicates that these proteases cleave the new linker. However incubation with Factor Xa, Arg-C or thrombin did not lead to a loss in infectivity, despite the presence of potential cleavage sites

Serial No.: 09/710,444

for these enzymes. Presumably the presence of the D2 and D3 domains may block access or cleavage for these enzymes in the case of the present polypeptide.

Replace Table 4, on page 24, with the following replacement Table 4:

Replace the paragraph at lines 8-17 on page 38 with the following replacement paragraph:

The phage displaying the Stoffel fragment are incubated with primer 13 [TTT CGC AAG ATG TGG CGT] (SEQ ID NO: 47) comprising a 5' maleimidyl group and a 3' biotinylated nucleotide. After incubation the phage are captured on streptavidin-coated beads, with a yield of about 1-5% of infectious phage. This shows that primer can be chemically cross-linked to the phage, presumably via p8 protein as shown for the N-biotinoyl-N'(6-maleimidohexanoyl) hydrazide. The phage are then incubated with primer 1b [GCGAAGATGTGG] (SEQ ID NO: 48) comprising a 5' maleimidyl group in the presence of biotin-dUTP 2 and template 3 [AAA TAC AAC AAT AAA ACG CCA CAT CTT GCG] (SEQ ID NO: 49). Capture of the phage is dependent on presence of 1b, 2 and 3 (Table 8), but also on the inclusion of trypsin, which cleaves the helper phage to reduce non-specific phage isolation.

Replace the paragraph at page 39, lines 19-27 with the following replacement paragraph:

For the cloning of (poly)-peptide encoding DNA fragments and their display for selection between barnase and p3, the phage fd-3 is constructed (Fig. 5). Phage fd-3 comprises the H1021A mutant of barnase N-terminally fused to the p3 gene of phage fd.TET. Between the codon for the last residue of barnase and the first residue of p3 is the nucleotide sequence *CTG GAG GCG GTG CGG CCG CA* (SEQ ID NO: 50). This sequence contains a PstI DNA restriction site (in italics) for insertion of DNA fragments flanked by PstI restriction sites. The sequence further introduces a frame shift between barnase and p3, which prevents expression of the correct p3 reading frame in fd-3. Phage particles of phage fd-3 therefore do not display the infection protein p3 and are non-infectious.

Replace the paragraph at page 40, lines 8-23 with the following replacement paragraph:

Genomic DNA from the *E. coli* strain TG1 is amplified in 30 cycles of a polymerase chain reaction (PCR) with an annealing temperature of 48°C using the oligonucleotide SN6MIX (5'-GAG **CCT GCA GAG CTC** AGG NNN NNN-3'; SEQ ID NO: 51), which comprises 6 degenerate positions at the extendible 3' end to ensure random priming. In a second step of 30 PCR cycles with an annealing temperature of 52°C primary PCR products are extended by re-amplification with the oligonucleotide XTND (5'-CGT GCG AGC **CTG CAG AGC TCA** GG-3'; SEQ ID NO: 52). Products with a length of around 150 bp from this reaction are purified from an agarose gel and reamplified in 30 PCR cycles using an annealing temperature of 52°C and the oligonucleotide XTND. These reamplified 150 bp fragments are partially digested with *SacI* (site indicated in bold in the oligonucleotides) and ligated for dimerisation. Ligated products are reamplified in a further 10 PCR cycles with an annealing temperature of 44°C followed by a 30 PCR cycles with an annealing temperature of 55°C using the oligonucleotide XTND. The annealing temperatures are chosen to discriminate against priming of the oligonucleotide in the middle of the dimerised fragments. The reaction product is size purified twice on an agarose gel to remove monomers and oligomers (non-dimers).

Replace the table on page 44 (Table 9) with the following replacement table:

- 6: CTTTATGCTTCCGGCTCG. (SEQ ID NO: 23)
- 7: CGGCCCCATTTCAGATCC. (SEQ ID NO: 24)--

- Replace Table 7, on pages 35 and 36, with the following replacement Table 7. Because portions of the original text are underlined, the present amendments are indicated by double underlining.

-Table 7. Randomised and selected sequences.

The randomised DNA sequence is given from 5' to 3'; above and below it, the bases that differ from the given sequence in the signal sequences pelB, 17, 19, 110 and 112 are indicated. The Shine-Delgarno sequence, the start codon and the last codon of the signal sequence, GCC, have been underlined. The HindIII and the NcoI restriction sites are in italics. The corresponding amino acid sequences are given below. Library I is initially designed from the pelB leader and library II from the g3 leader.

III-A. From library I

--Replace the paragraph at lines 8-17 on page 38 with the following replacement paragraph. Please note that the sequences were presented in brackets in the original filed application. The brackets are replaced by parenthesis herein.

--The phage displaying the Stoffel fragment are incubated with primer 13 (TTT CGC AAG ATG TGG CGT) (SEQ ID NO: 47) comprising a 5' maleimidyl group and a 3' biotinylated nucleotide. After incubation the phage are captured on streptavidin-coated beads, with a yield of about 1-5% of infectious phage. This shows that primer can be chemically cross-linked to the phage, presumably via p8 protein as shown for the N-biotinoyl-N'(6-maleimidohexanoyl) hydrazide. The phage are then incubated with primer 1b (GCGAAGATGTGG) (SEQ ID NO: 48) comprising a 5' maleimidyl group in the presence of biotin-dUTP 2 and template 3 (AAA TAC AAC AAT AAA ACG CCA CAT CTT GCG) (SEQ ID NO: 49). Capture of the phage is dependent on presence of 1b, 2 and 3 (Table 8), but also on the inclusion of trypsin, which cleaves the helper phage to reduce non-specific phage isolation.--

- Replace the paragraph at page 39, lines 19-27 with the following replacement paragraph:

--For the cloning of (poly)-peptide encoding DNA fragments and their display for selection between barnase and p3, the phage fd-3 is constructed (Fig. 5). Phage fd-3 comprises the H1021A mutant of barnase N-terminally fused to the p3 gene of phage fd.TET. Between the codon for the last residue of barnase and the first residue of p3 is the nucleotide sequence *CTG GAG GCG GTG CGG CCG CA* (SEQ ID NO: 50). This sequence contains a PstI DNA restriction site (in italics) for insertion of DNA fragments flanked by PstI restriction sites. The sequence further introduces a frame shift between barnase and p3, which prevents expression of the correct p3 reading frame in fd-3. Phage particles of phage fd-3 therefore do not display the infection protein p3 and are non-infectious.--

- Replace the paragraph at page 40, lines 8-23 with the following replacement paragraph:

--Genomic DNA from the *E. coli* strain TG1 is amplified in 30 cycles of a polymerase chain reaction (PCR) with an annealing temperature of 48°C using the oligonucleotide SN6MIX (5'-GAG **CCT GCA GAG CTC** AGG NNN NNN-3'; SEQ ID NO: 51), which comprises 6 degenerate positions at the extendible 3' end to ensure random priming. In a second step of 30 PCR cycles with an annealing temperature of 52°C primary PCR products are extended by reamplification with the oligonucleotide XTND (5'-CGT GCG AGC **CTG CAG AGC TCA GG**-3'; SEQ ID NO: 52). Products with a length of around 150 bp from this reaction are purified from an agarose gel and reamplified in 30 PCR cycles using an annealing temperature of 52°C and the oligonucleotide XTND. These reamplified 150 bp fragments are partially digested with SacI (site indicated in bold in the oligonucleotides) and ligated for dimerisation. Ligated products are reamplified in a further 10 PCR cycles with an annealing temperature of 44°C followed by a 30 PCR cycles with an annealing temperature of 55°C using the oligonucleotide XTND. The annealing temperatures are chosen to discriminate against priming of the oligonucleotide in the middle of the dimerised fragments. The reaction product is size purified twice on an agarose gel to remove monomers and oligomers (non-dimers).--

Sequence Rule Compliance: NOTICE TO COMPLY

This application fails to comply with the sequence rule requirements of 37 C.F.R. §§ 1.821-1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. This application encompasses sequences needing sequence identifiers (e.g. see pages 9, 15, 24, 30, 35, 36, 38, figures etc.).

APPLICANT IS GIVEN 30 days FROM THE DATE OF THIS LETTER WITHIN WHICH TO COMPLY WITH THE SEQUENCE RULES, 37 C.R.F. §§ 1.821-1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 C.F.R. § 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 C.F.R. § 1.136. In no case may an applicant extend the period for response beyond the six month statutory period. Direct the response to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the response.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Celsa whose telephone number is (703) 305-7556. If the examiner cannot be reached, inquiries can be directed to Supervisory Patent Examiner Venkat whose telephone number is (703) 308-0570. The fax number for the organization where this application or proceeding is assigned is (703) 308-4242. Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Bennett Celsa (au 1627) (Feb. 25, 2002)

BENNETT CELSA
PRIMARY EXAMINER

**NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING
NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES**

The nucleotide and/or amino acid sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 CFR 1.821 - 1.825 for the following reason(s):

- ☒ 1. This application clearly fails to comply with the requirements of 37 CFR 1.821 - 1.825. Applicant's attention is directed to these regulations, published at 1114 OG 29, May 15, 1990 and at 55 FR 18230, May 1, 1990.
- ☒ 2. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 CFR 1.821(c).
- ☒ 3. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 37 CFR 1.821
- ☐ 4. A copy of the "Sequence Listing" in computer readable form has been submitted. However, the content of the computer readable form does not comply with the requirements of 37 CFR 1.822 and/or 1.823, as indicated on the attached marked-up copy of the "Raw Sequence Listing."
- ☐ 5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A substitute computer readable form must be submitted as required by 37 CFR 1.825(d).
- ☐ 6. The paper copy of the "Sequence Listing" is not the same as the computer readable form of the "Sequence Listing" as required by 37 CFR 1.821(e).
- ☐ 7. Other: _____

Applicant must provide:

- ☒ An initial or substitute computer readable form (CRF) copy of the "Sequence Listing"
- ☒ An initial or substitute paper copy of the "Sequence Listing", as well as an amendment directing its entry into the specification
- ☒ A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 CFR 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d)

For questions regarding compliance with these requirements, please contact:

For Rules Interpretation, call (703) 308-1123
For CRF submission help, call (703) 308-4212
For PatentIn software help, call (703) 308-6856

Please return a copy of this notice with your response.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities – 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
